

National Grid Gas NTS

(Briefing Note 002)

NTS Meter Errors Between 28/03/2007 and 07/04/2009

1. Introduction

Further to previous correspondence via the Joint Office of Gas Transporters web site regarding NTS meter errors, an independent company appointed by National Grid has now completed the assessment at each of the affected sites¹.

2. Next Steps

All shippers associated with the affected sites during this period were contacted and National Grid NTS will shortly be writing to each of them to confirm the individual impact on their transportation charges for each site, with the exception of Moffat. This is due to the complexity of the Moffat site and National Grid NTS will liaise with the Moffat Allocation Agent to confirm the individual impacts for affected shippers.

Invoices will be issued under separate cover.

3. Timescales

The impact notification letters will be issued to all affected shippers during November 2010, with the exception of the Moffat shippers who will be contacted early in the new year, with invoices then being issued under separate cover.

4. Contacts

For further information please contact Ian Bagworth, Gas Policy and Shipper Support Manager, Tel: 01926-655832 or please send your query to ukt.customer.enquiries@uk.ngrid.com marked for the attention of Ian Bagworth.

¹ Affected sites are listed in the annex to this note.
