## UK Link Programme Impact Assessment Form

### Change Description:

These are the existing RGMA validation rules in legacy and new UK Link, as detailed below, the validations are required to be changed to that detailed:

### ONJOB submission:

ONJOB Shipper validations shall ensure that one of the following conditions is satisfied:

- ONJOB transactions received from a User with a **LI confirmation** for the specified meter point; If a retrospective effective date is specified
  - It should be greater than the last reading if transfer reads are loaded.
  - If transfer reads are not loaded then it can be as early as when the confirmation was in CO status.
  - **Amend the rule to allow for an update to have an effective date pre the CO status providing no other User has a confirmation at LI or CO on the effective date.**
- ONJOB transactions with DUC received from a user with LI confirmation for the specified meter point, then the user must hold LI confirmation on both the processing date and the effective date.
- ONJOB transactions received from a User with a **SU confirmation** for the specified meter point. ONUPDs with an Appointment dataset will be accepted provided that the date is within the ONUPD submitter's period of ownership, and a subsequent reading has not been loaded.
- ONJOB transactions submitted for a supply point where the User has a confirmation at **CO (confirmed) status**. Such transactions shall be accepted regardless of another user having a confirmation at LI status as long as the effective date of transaction is on or after the date when the confirmation was at CO status.
- ONJOB transactions submitted for a meter point where the User has a confirmation at CO (confirmed) status, and the appointment date indicates that the effective date is BEFORE the commencement of the CO or RQ will be accepted only if there is no other user having a LI confirmation.
- ONJOB transactions submitted for a supply point where the User has a confirmation at **RQ (requested) status** Such transactions shall be accepted provided that no other user has a confirmation at CO or LI status. Note: where an appointment and / or reading dataset is provided and the date is BEFORE the commencement of the RQ status this **will not** stop the ONJOB from being accepted, provided that does not fail validation on last activity date.

### ONUPD submission:

ONUPD RSU Validation shall ensure that one of the following conditions is satisfied:

- ONUPD transactions received from a User with a **LI confirmation** for the specified meter point. If a retrospective effective date is specified – within the APPNT and READG datasets – this must be within the Users ownership.
  - **Amend the rule to allow for an update to have an effective date prior to the period of ownership providing no other User has a confirmation at LI or CO on the effective date.**
- ONUPD transactions received from a User with a **SU confirmation** for the specified meter point. ONUPDs with an Appointment dataset will be accepted provided that the date is within the ONUPD submitter's period of ownership, and a subsequent reading has not been loaded. In such instances any dates provided in a Reading dataset shall not be used. Where only a Reading dataset is received, such a transaction will be accepted where this has a date in the ONUPD submitters period of ownership, and a subsequent reading has not been loaded – e.g. the OPNT.
- ONUPD transactions submitted for a supply point where the User has a confirmation at **CO (confirmed) status**. Such transactions shall be accepted provided that no other user has a confirmation at LI status. Note: where an appointment and / or reading dataset is provided and the date is BEFORE the commencement of the CO or RQ status this **will not** stop the ONUPD from being accepted, provided that does not fail validation on last activity date.
- ONUPD transactions submitted for a supply point where the User has a confirmation at **RQ (requested) status** Such transactions shall be accepted provided that no other user has a confirmation at CO or LI status. Note: where an appointment and / or reading dataset is provided and the date is BEFORE the commencement of the RQ status this **will not** stop the ONUPD from being accepted, provided that does not fail validation on last activity date.

### Reason for Change / Justification:

The amendment to the rules will allow for asset updates to be recorded with the correct effective date in the register and allow for Xoserve to correctly bill Capacity and Commodity as set out in the UNC.

### Requirement relevant to the Request:

*(Please detail the relevant requirements to the request and if it needs to be changed as a result of the request being raised)*

### Impacted System(s):

New Uk Link
